ProEdge Turbo Ceramic Cup Wheels, 5" and 7"

Our newest ceramic cup wheel: faster cut, cooler running and longer life on edges.

Our newest ceramic cup wheel. A turbo segment pattern cuts more aggressively than standard segmented ceramic wheels, so metal-bond scratches come out faster along edges, corners and handheld areas. The open turbo layout moves heat away from the cutting face, which means less glazing and less burning, and the segments are taller than typical ceramic cup wheels for more working life per wheel.

More aggressive cut

Faster scratch removal than standard segmented ceramic.

Taller segments

More working ceramic per wheel.

Runs cooler

Less glazing and less burning.

Tested before it ships

Every wheel balance- and breakage-tested.

TOOL LIFE & VALUE

Taller

segments than typical ceramic cup wheels

More ceramic to wear through and less glazing means fewer wheels per job, and the faster cut means less time on the edges, where crews lose the most hours per square foot.

WHERE IT FITS

- ① Grind
- ② **Transition**
- ③ Polish
- ④ Burnish / maintain

BEFORE Metal-bond cup wheel
AFTER Resin honeycomb pads
